**Engl 3210. Advanced Grammar**

Advanced Grammar is the study of present-day English grammar and usage. The study incorporates traditional, structural, descriptive, and other modern language theories for a sound pedagogical grammar that emphasizes analytical thinking. The course uses written and oral texts to facilitate the study of form, function, and meaning of English structures within discourse contexts. The study encourages learning the grammatical concepts and terminology for sounds, words, phrases, clauses, and sentences.

**Objectives**

1. To understand the grammatical concepts which link form and function to meaning.
2. To analyze grammatical structures in spoken and written varieties of English.
3. To use specified grammatical elements (morphemes, phrases, clauses) from writing and speaking to compose and communicate a variety of sentence styles and patterns.
